HireMe AI — Recruiter Assistant

<https://www.linkedin.com/in/debanjit-halder/>

<https://github.com/debanjithalder-dev>

SUMMARY

A motivated, enthusiastic and goal oriented Computer Science Engineering student with strong problem-solving, critical thinking, and communication skills. Committed to continuous learning and building efficient, high-quality projects while seeking opportunities to grow professionally in the field of Computer Science.

TECHNICAL SKILLS

- **Languages:** C++, Python, SQL
- Data Structures & Algorithms
- Machine Learning, NLP, Gen AI
- **Artificial Intelligence:** ReAct, Prompt Chaining, Structured Output, RAG, Embedding

CERTIFICATES

- Getting Started with Artificial Intelligence(IBM) | Mar '26
- OpenAI Generative pre-trained Transformer(Infosys) | Apr '26
- Generative AI (Physics Wallah) | June '26
- Fundamentals of Cybersecurity(IBM) | June '26
- Cybersecurity with GenAI(IBM) | July '26

SOFT SKILLS

- Leadership
- Creativity
- Teamwork

EXTRA CURRICULAR ACTIVITIES

- Professional Badminton Player
- Bike Riding

INTERNSHIP

Edunet Foundation - Emerging Technologies Internship

June '26 - July '26

- Completed an internship focused on Agentic AI, Cyber Security, and Quantum Computing, gaining hands-on exposure to emerging technologies using IBM SkillsBuild, IBM Cloud, and IBM BoB. Also developed an industry relevant project in Artificial Intelligence and Cloud Computing.

TRAINING

C++ | Physics Wallah

May'25 - Aug'25

- Learned fundamental programming concepts such as variables, data types, operators, control statements, and loops.
- Developed a deeper understanding of object-oriented programming language concepts that allow creation of classes, objects, and functions that can be reused and extended.
- Understood how computer memory works and how to optimize code for performance.

DSA Self Placed | LeetCode, LLC

Sep'25 - Dec'25

- By learning DSA, developed a deeper understanding of basic programming concepts like arrays, linked lists, trees, graphs, and algorithms.
- Learned how to analyze the time and space complexity of algorithms and data structures. Enhanced coding skills by implementing various DSA concepts in real-world scenarios.

PROJECTS

Crop Recommendation — Maximize Agricultural Yield by Recommending Appropriate Crops

June '26

- Aim: To recommend suitable crops based on agricultural and environmental parameters to help maximize crop yield and support effective farming decisions.
- Outcomes: Developed an AI-based crop recommendation solution capable of analyzing input parameters and suggesting appropriate crops for improved agricultural productivity.
- Technology Used: IBM watsonx.ai Studio, AutoAI, IBM Bob

HireMe AI — Interactive Recruiter Chatbot

Aug '26

- Aim: To build an interactive, full-stack AI candidate representative allowing hiring managers and recruiters to query candidate skills, technical background and experience in real time.
- Outcomes: Developed a full-stack GenAI application featuring real-time token streaming, dynamic resume schema parsing, interactive session history management and contextual follow-up suggestions.
- Technology Used: React 18, Vite, Tailwind CSS, FastAPI, Groq API (Llama 3.3 70B), Pydantic, Python

EDUCATIONS

Future Institute of Technology, Kolkata

Aug'23 - Jun'27

B.Tech CSE(IoT, CS & Blockchain)

Score: 8.4 CGPA

St Joseph's Convent High School (Class XII)

June '21 - Apr '23

Score: 88%

St Joseph's Convent Higher Secondary School (Class X)

Score: 86%
